

Aegis Banking AI

 **Safe & Adaptive Voice Assistant for Rural & Elderly Users**

Theme: Digital Adoption

Your Security Partner: Proactive Scam Interception

The Adoption Problem

- ✓ **Confusing Screens:** Apps are often filled with complicated menus and financial words that users don't understand, causing them to get stuck and abandon the process
- ✓ **Fear and Worry:** Users are scared of losing money because of scams, especially over the phone and through screen sharing, so they avoid digital banking altogether

The Target Market Opportunity

Bridging the Rural Trust Gap

65% of India's population

- ✓ **Sixty-five percent** of India's population resides in rural areas.
- ✓ **Despite holding bank accounts**, the majority still prefer walking to physical branches due to technical hesitation and application anxiety.
- ✓ **The Goal:** Unlocking this segment represents the next frontier of massive digital adoption for SBI.

Introducing Aegis Banking AI

The Innovation: Multi-Agent Contextual Reasoning

UX Morphist

✓ UX Morphist Agent

- Senses user confusion in real-time.
- Instantly morphs app interface into a simplified, voice-driven mode.

Guardian Shield

✓ Guardian Shield Agent

- Active background monitoring.
- Intercepts scam calls and unauthorized screen sharing before execution.

Wealth Navigator

✓ Wealth Navigator Agent

- Analyzes life-events locally on-device.
- Provides proactive micro-investment and financial guidance via native voice.

Core Pitch: “An autonomous, Multi-Agent banking companion that actively adapts to user behavior and shields them from environmental threats in real-time.” ✨

Dynamic Interface Transformation

Feature Focus: Adaptive UI Morphing

Cluttered App

- Tiny fonts
- Complex navigation maps
- Cluttered menus

Standard Banking App Mode

Aegis Mode

- Large high-contrast buttons
- Clean fonts
- Zero text-heavy jargon
- Step-by-step native voice guidance

Voice-First Simplified Mode

Proactive Fraud Interception

Focus — The Guardian Shield

Live Environmental Checks

- ✓ Safely checks for active external phone calls while banking.
- ✓ Detects unauthorized remote-access apps (e.g., AnyDesk, TeamViewer).

Instant Freeze Trigger

- Automatically freezes transactions upon detecting a scam pattern.
- Voices an audio warning: "Scam detected. Transaction locked for your safety."

Secure Enterprise Architecture

Technical Architecture & Tech Stack

Strategic Business Impact for SBI

Key Benefits

- ✓ **Drastic CAC Reduction**
→ Automated conversational onboarding removes branch overhead.
- ✓ **Fraud Interception Success: Elimination of Fraud Liabilities**
→ Device-level scam interception protects capital.
- ✓ **Cross-Selling Lift: Enhanced Cross-Selling**
→ Tailored local advice boosts product conversion.
